

**Inside your bag, you have the following:**

- 3 T-Shirt Strips Tied Together

### **Directions – How to make a DIY Dog Toy**

1. Take the knotted t-shirt strips and braid them. (See bottom for directions on how to braid.)

2. Once you have them braided, leave some room at the end and tie them into a knot. (You may need an adult to help you with this part.)

That's it! Now go find your dog and enjoy play time! If you do not have a dog, find a friend who does and give them the toy you made so they can enjoy play time with their puppy.

## How to Braid

The basic principle for making a three strand braid is to alternate the strips you put into the middle space. The sequence is simply this:

Put the left cord into the center, then the right cord. Repeat until you have reached your desired length. Yes, it is that easy!
